

K12 eWALLET

OVERVIEW

With K12 eWallet, students no longer need to carry cash for school fees and purchases. K12 eWallet allows parents to authorize virtual credit card payments for school-related purchases such as art supplies, bookstore materials, snacks, spirit wear, ticket sales, and any other items offered within a district.

While students can freely roam your campus and school events spending money with K12 eWallet, mom and dad still have control over permitted expenditures and spending limits. Promoting convenience and safety, parents can cancel K12 eWallet usage at any time from their desktop computer or mobile device, and authorized credit cannot be converted to cash.

HOW DOES K12 eWALLET WORK?

After registering for EFS K12 eWallet, students will be able to make purchases and payments throughout the school campus at any Kpas Station without cash. Parents/Guardians simply authorize the maximum amount a student may spend on a specific item or total expenditure for a single day.

CONVENIENCE FEE

EFS K12 eWallet is provided by e~Funds for Schools, a third party service provider. EFS charges the parent a fee for the usage/convenience of K12 eWallet on all purchases.

PURCHASE NOTIFICATION RECEIPTS

Parents/Guardians will receive an email listing all purchases and fees of each EFS K12 eWallet activity.

PURCHASE HISTORY

Parents/Guardians may log onto e~Funds for Schools at any time and view purchases made.
